

TECHNICAL INFORMATION SHEET

SEAL-GUARD® STONE CLEAN

HIGHLY CONCENTRATED DAILY CLEANER

Description: Seal-Guard® Stone Clean is a high-quality, highly concentrated liquid cleaner based on natural detergents and special cleaning and care agents. The product is slightly alkaline and contains no waxes or solvents. Seal-Guard® Stone Clean is gentle on your skin, low-foaming, freshly scented, biodegradable and economical to use. Seal-Guard® Stone Clean leaves an ultra-thin antistatic and dirt-repellent film on surfaces but does not form layers. Use regularly to highlight the beautiful colour and structure of your surfaces. Surfaces will also become noticeably dirt-repellent, more stain-resistant and easier to care for. Seal-Guard® Stone Clean supports the protection of surfaces impregnated with Seal-Guard®.

Application: Use Seal-Guard® Stone Clean for everyday cleaning of all types of stone surfaces, including natural stone, such as marble, granite, travertine, slate, limestone, bluestone, sandstone, basalt and quartzite, as well as terrazzo, concrete stone, porcelain stoneware, (glazed) ceramic tiles, terracotta, etc. Seal-Guard® Stone Clean is suitable for polished, grinded or rough, impregnated, surface-sealed or untreated surfaces. Consumers can use it in mop water, but this low-foaming cleaner is also suitable for professional use in scrubber dryers and wet vacuum cleaners. That is why Seal-Guard® Stone Clean is also used by large-scale users such as cleaning companies, hospitals, schools, floor-maintenance companies, the government, the hospitality industry, etc.

Dosage: Add 25-50 ml of Seal-Guard® Stone Clean to 10 litres of (mop) water. For initial treatment or for porous or very dirty surfaces, use a little more. For a glossy effect, use 200 ml per 10 litres of water.

Directions for use: Try the product in an inconspicuous spot first to determine its suitability for the intended use. Preferably dilute Seal-Guard® Stone Clean with (lukewarm) water and mop the floor or scrub it by hand or with a machine. Remove or vacuum up loose dirt. Do not rinse the film left by the cleaner with clean water. Buff the dry floor if desired.

Coverage: Approximately 10 litres of diluted Seal-Guard® Stone Clean will cover 100 m².

Packaging: Available in 1-litre containers (12 x 1 litre per box).

Technical data:

Density:	1.01 kg/l (20° C)
pH value (concentrate, undiluted):	10.0
pH value (diluted, 25-50 ml per 10 litres of water):	approximately 8
Viscosity:	< 50 mPa·s (20° C)
Appearance:	green solution
Odour:	fresh, perfumed
Solubility in water:	full

Storage: Keep only in the original, tightly closed container in a cool, well-ventilated place. Do not allow to freeze.

Note: Please refer to the Seal-Guard® Stone Clean Safety Data Sheet for more information on safe use and any personal protective equipment required.

The manufacturer/supplier is not liable for any direct or indirect consequences resulting from the incorrect application of its products. The only obligation of the manufacturer/supplier is to replace defective products. You are responsible for determining in advance whether a product is suitable for the intended use (at your own risk).
